## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: Claim 1 is allowable over the prior art since the cited references taken individually or in combination fail to disclose in particular providing pre-recorded spatial sound data in at least two channels of a single audio file associated with an object determined to be moving fast through a scene in a virtual environment, including at least spatial approaching sound data recorded in a first channel of the audio file and spatial retreating sound data recorded in a second channel of the audio file, and consecutively playing the prerecorded spatial sound data for each of the at least two channels of the audio file associated with the object as it moves past the point of view in the scene. The closest prior art of record Okabe et al. (US 6,572,475) discloses providing spatial sound data based on a determined three dimensional virtual game space associated with an object, however fails to disclose the above patentably distinct features. Likewise, the other references of record do not disclose the patentably distinct limitations of claim 1 and it would not have been obvious to one of ordinary skill in the art at the time of the invention to modify the prior art to include all the limitations of independent claim 1. Independent claims 15, 16, 21, and 26 recite similar limitations to claim 1 and therefore are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
